

AIR QUALITY MONITOR

USES : Check air quality (particulates) in indoor or outdoor environments.

[CLICK HERE TO PLACE ME ON HOLD!](#)

FEATURES : Displays immediate air quality data both indoors and out, to help create a healthier environment. See invisible threats in the air, understand where they come from and take control with the Pro's tailored recommendations. Compare your air with the closest outdoor monitoring station. The Pro combines cutting-edge laser technology, airflow control, and a crafted calibration algorithm.
