ME ON HOLD!

**USES :** View various cosmic and earthly phenomenon.

**FEATURES :** The Orion StarBlast 4.5 Astro Reflector (right) and Astroscan (left) telescopes are perfect for beginning and intermediate stargazers. Great for viewing the moon, planets, stars, and other objects in space and on Earth. The StarBlast telescope comes with two eyepieces, an attachable autfinder, and the *50 Things to See with a Small Telescope* guidebook.

***Never look directly at the sun through a telescope.***
